

Resident **TESTIMONIAL**

“

We like the Montgomery area. It's nice to walk outside without ever leaving the campus. We wanted a safe location with a friendly environment and opportunities to be active with a fitness center and feel safe walking. We like going to chapel and providing things for residents living in the memory units.

We looked at a lot of different places in the area, but Twin Lakes just seemed to have all the things we were looking for. It was close to our church and where I grew up, which was nice.

We think Twin Lakes is the best, maybe the best period! It also has a wonderful swimming pool. We have rehab services, which is incredibly helpful. People from outside the community even come to use these services, and the staff is great.

I like the location, convenience, and safety of Twin Lakes. The residents and staff are very nice. We have a lot of friends here, and many people I used to work with are here. The staff notices things people might struggle with and are willing to bend over backwards to get them what they need. It's a walkable community, which is nice because everything is accessible, and you get your exercise in while looking at the beautiful scenery. The residents like to sit in the courtyard at night and talk, and I think that's so lovely and friendly, very community-like.

We utilize The Connection and many of the classes offered. Twin Lakes has great programs with a little bit of everything. There's music played here, brunch once a week, and more activities than you could ever get to participate in. There's a nice library where you can go and read. They even had a fishing tournament once in one of the ponds! We're fairly independent, so we can still go out and meet friends and go to soccer games.

They have bible studies and the chapel here. They also take us to outside events like the ballet, which is very nice. We've taken advantage of many events, programs, and amenities at Twin Lakes. We eat here most of the time because the food is extremely good and varied. There's been musicians and a famous astronomer from the area that have come to perform or talk with us. Participating in the activities around here makes you feel valued and appreciated, like attending the chapel.

A lot of the people I've known and practiced with for years in healthcare have ended up moving here and we've become very close friends.

We made the right choice for a place to live. We visited a friend in another senior living community, and while it's a lovely place, I'm so happy to be here at Twin Lakes.
